

## Albany Primary School

### The Your Move Journey

Albany Primary School has taken a whole of school approach to implementing Your Move.

As part of this approach:

- The school has a teacher supported Your Move student team of Year Five students
- A parent volunteer led Walking School Bus operates morning and afternoon, four days a week
- A series of special events such as Fume Free Fridays and National Ride2School Day encourage active transport
- A series of Council supported bike skills and maintenance education workshops have run, to improve the student's bike riding skills
- Infrastructure has recently been improved, with new scooter racks and signs (using Your Move points).

This has resulted in consistent Hands Up Survey results showing a reduction in students getting to school by car, with students saying they feel better and enjoy getting active.

## City of Subiaco

### Staff Sustainable Travel Initiatives

The City of Subiaco promotes a number of sustainable travel initiatives supporting staff to choose different travel options to get to work and business meetings.

Staff members are offered a Sustainable Travel Allowance instead of a parking permit if they are travelling to work by active transport, currently at \$9 per day. Each year 30 to 40 per cent of eligible staff choose the travel allowance as an incentive for active travel.

Four SmartRiders are available to staff for business trips. Each of the four cards is used at least once or twice per week, and over the last two years there has been a total of 145 SmartRider journeys.

A pool e-bike fleet is also well used by staff.

## Lakelands Primary School

### Lakelands Your Move

Lakelands Primary School rolls out a range of Your Move initiatives each year encouraging students to get more active.

A range of annual events are held to engage students and parents, including scavenger hunts, banner design competitions, bike education sessions, and Walk Over October competitions. The Your Move team helps organise events and get students on board.

In 2018 there was a 60 per cent increase of students riding to school on Dress Up Your Bike Day.

An active social media page has helped spread Your Move messages across the whole school community.

## Curtin University

### Implementation of Integrated Transport and Movement Plan

Curtin University's Integrated Transport and Movement Plan was finalised in January 2017 after a four-week consultation period. Staff, students and visitors were invited to share their views on Curtin's approach to transport. The plan addresses four key areas of improving access options: travel behaviour change, advocacy and leadership, and wayfinding.

A number of projects from the plan have already been implemented, including:

- Installing more U-rail bike parking across campus
- Additional signage
- Events such as Ride2Curtin Breakfast, free BikeDr sessions for students
- Two bike-part vending machines
- E-bike trial for staff
- Development of an ongoing evaluation framework.
