

City of Joondalup

Shepherds Bush Park Upgrade and Robertson Road Cycleway

The Shepherds Bush Park upgrade improves walking and cycling access to some of the City of Joondalup's top natural conservation areas.

A creative approach has aimed to appeal to all demographics and provide engaging ways to get active in the park.

The project included:

- Hugely popular bike skills track for learning to ride
- Pumps and Jumps – upgraded BMX facility
- Upgrade of limestone walking paths in the bushland
- 2.4km of separate walking and cycling access paths
- Two bike repair stations
- Wayfinding signage.

Community access to the park has significantly increased since the upgrades; the new facilities encourage residents to get active and showcase the City of Joondalup's environmental and cultural assets.

Eastern Metropolitan Regional Council

The Swan River Ramble

The Swan River Ramble uses a creative, fresh approach promote active transport for people of all ages.

A fun competition, the Swan River Ramble encourages staff and residents to get outdoors and active along the Swan River. Participants follow wayfinding signage to discover fictional character 'Eric' hidden along the river, unlocking information by scanning a QR code.

The project is ongoing and free for walkers and cyclists to enjoy. In 2018 participants went into a draw to win a prize.

Lakelands Primary School

Plan, Educate, Reflect Your Move Initiative

Your Move has become part of the culture at Lakelands Primary School. Your Move is embedded in the school and wider community as the team plans, educates and hosts variety of fun events each year to engage students in active, independent travel options.

An active student team meets each term to set goals and select prizes earned with Your Move points, used to reward students and keep the Your Move momentum going.

Baldivis Secondary College

Year Seven Transition Project

The Year Seven Transition Project increased the number of Year Seven students choosing active transport to get to school compared to previous years.

The program targeted families before the children started Year Seven with lots of great transport information and resources.

Once the students got to school, they participated in a number of workshops embedded in the Science curriculum. These workshops involved the Green Team student leaders to foster peer to peer learning.

The Transition Project helps minimise the stress of the move to high school, supports students to develop independence and resilience, and connect positively with their local community.

Parents and children alike have reported feeling more confident in choosing independent travel options, and staff have observed reduced vehicle traffic around the school.

Mount Hawthorn Primary School

Move it Monday Marshals

Year Four students are excited about their new mission as Move it Monday Marshals!

Marshals greet students as they walk into school, and reward those who walk, scoot or ride with a Faction Token, a great incentive that is part of a whole school rewards program.

Year Four students have participated in Bike Education and researched the environmental impacts of driving, motivating them to take their new role seriously.

Mount Hawthorn's biggest achievement has been the growing community awareness and enthusiasm for Your Move (extra scooters and bikes in the bike shed have also been pretty cool!).
