

Schools Online Activity Pack 3

Ideas to keep Your Move activities rolling in Term 2

This is the third and final online activity pack to make delivering the program easier during this time. Each pack contains five ideas for Your Move activities that can be completed now and adapted into remote class delivery. We encourage you to build on these ideas using your expertise and creativity and don't forget to post stories about the activities on the [Your Move website](#) to keep earning points.

1. Local transport, global impact

This activity encourages students to consider transport choices and understand the links between vehicle use, carbon emissions and global warming.

Key Learning Areas	Suggested age range	Ideas for adapting to online delivery
Science & Humanities and Social Science	Y4 – Y8	<ul style="list-style-type: none"> • Quite a comprehensive lesson that could be broken down into smaller topics, either for online group discussion or individual student research. • An excellent opportunity to link in current discussions and articles on the impact of COVID-19 on global emissions and local lifestyles, such as: <ul style="list-style-type: none"> ○ BBC Future – Will COVID-19 have a lasting impact on the environment? ○ The Conversation - Coronavirus reminds us how liveable neighbourhoods matter for our wellbeing

2. Basic bike maintenance at home

It's important to keep bikes well maintained for safer, easier and more enjoyable journeys. Visit our Remote Learning Resource Hub for all the information you'll need.

We have links to basic bike maintenance tips and videos to help you learn the basics, including how to complete the Sustrans 11 point 'M Check' and how to do a step-by-step clean and detail.

- [Click here to visit the Remote Learning Resource Hub](#)

3. Classroom Activity: Research transport through the years

This classroom activity encourages students to conduct historical research on the ways transport has changed over the past 100 years.

Key Learning Areas	Suggested age range	Ideas for adapting to online delivery
Humanities and Social Sciences & English	PP – Y6	<ul style="list-style-type: none"> • Interviews from the 'Interview Parents and Grandparents' activity can also be used to inform this research. • Students could use an online tool such as 'Tiki-Toki' to create an historical timeline. • The class could conduct a 'future transport' hypothetical discussion. • The class could explore how COVID-19 has changed their family transport habits: Have they been getting around differently?

4. Protect your bike with Bikelinc from Crime Stoppers

We've seen a major increase in the amount bikes being sold in WA, mostly purchased by families looking to increase their physical activity at home, which is awesome. Some of your students may even be thinking about riding to school for the first time.

We recommend registering new bikes online with Crime Stoppers WA's free Bikelinc network., Bikelinc assists WA Police to reunite lost and stolen bikes with their owners. Promoting Bikelinc to your school community will also earn you 25 points on the Your Move website with the 'Promote Bike Security' activity.

5. Promote road safety with Constable Care's Arility app

The amazing team at Constable Care Child Safety Foundation have created Arility - a fantastic new augmented reality app to help teach road safety in the classroom. Arility creates realistic road and traffic scenarios and teaches students to identify safe choices in different situations.

The app works on all Apple and Android tablets and the Arility website has accompanying lesson packs for ages 4 -11 that are linked to the Australian curriculum.

Hopefully later in the year you'll be able to book in a class excursion to the brilliant Constable Care Safety School, but this is a great option in the meantime.
